WORK EXPERIENCE

Laravel Developer
Novapex software Technologies
08/2021 - Present

PROJECTS

Remote Monitoring Application

- **Data Processing and Analytics** : Implemented data processing mechanisms to handle and analyze large volumes of data collected from remote monitoring devices. Leveraged Laravel's powerful features for efficient data handling, transformation, and storage.
- **Real-time Monitoring** : Implemented real-time monitoring capabilities using Laravel's event-driven architecture. Built event listeners and dispatchers to handle and process data updates in real-time, providing instant feedback to users.
- **Statistical Reporting** : Created statistical reports and visualizations based on the processed data. Utilized Laravel's data manipulation capabilities, including querying, filtering, and aggregating data to generate insightful stats and graphs. .
- **RESTful API Development** : Developed robust and secure RESTful APIs using Laravel, adhering to best practices and industry standards. Ensured proper authentication, authorization, and data validation.
- **Security and Data Privacy** : Implemented security measures such as encryption, secure API endpoints, and role-based access control to ensure data confidentiality and protect against unauthorized access.

Valeroo ↗

- **Valeroo B2B:** plateform is a robust and secure online marketplace that seamlessly connects buyers with suppliers
- **User Registration and Authentication** : Implemented a secure and user-friendly registration and authentication system for both buyers and suppliers. Integrated Laravel's authentication features to ensure proper access control and data security.
- **Supplier Profile Management** : Developed a comprehensive supplier profile management system, allowing suppliers to create and manage their profiles effectively.
- **Buyer-Supplier Matching Algorithm** : Designed and implemented a sophisticated algorithm to match buyers with the most relevant suppliers based on their requirements, location, and preferences.
- **Scalability and Performance Optimization** : Optimized the platform for scalability, ensuring it can handle a large number of concurrent users and increasing data volumes. Implemented caching, database optimization techniques, and efficient query execution to enhance performance.

EDUCATION

Software Engineering
Virtual University Of Pakistan, Lahore
08/2017 - 10/2021

PROGRAMMING STACK
